Private Dentistry - Facial Aesthetics

Spring Newsletter 2010

WE ARE MOVING!

May I take this opportunity to wish you a Happy and Healthy New Year.

Our main news is that after 13 years here in the Old Roan, we are moving premises, but thankfully only 2 minutes away! We are moving next door to Copy Lane Police Station, in between the Police Station and the Packet Steamer Pub Restaurant on the Northern Perimeter Road. The building is called Switch House and it has its own 60 space car park attached to it for your convenience. It is only 2 minutes in the car from where we currently are in the Old Roan. Access to the car park is as though you were turning in off the Northern Perimeter Road to go to the Travel Inn or Packet Steamer.

So Why are we moving?

Well as you know at present we have a small facility with two treatment rooms. Over the last 10 years dentistry and patients expectations of it has changed enormously with programmes such as **10 Years Younger** and **Extreme Makeover**, and the evidence relating the importance of a healthy mouth to overall health. As a result I and the team have invested heavily in further education and new technology to enable us to provide the modern solutions to problems people present to us today.

The new practice will have 4 treatment rooms in addition to a new "Spa" room, in which you may wish to have a relaxing massage or facial after your treatment. We will also be expanding the range of services we offer, details of which are inside this brochure. We look forward to seeing you in our new practice!

Oral Health maintenance. Your annual mouth MOT!

The maintenance of good oral hygiene and keeping your mouth healthy is the most important thing we do in the practice. We have been training regularly with consultants from America over the last 5 years to enable us to provide the best in dental hygiene care. Emma, our dental hygienist, is caring and passionate in equal measure about bringing excellence to her speciality, and is the best at her job I have worked with. Most patients see her at least annually for their 1 hour continuing care appointment, at which she will check all hard and soft tissues for disease and oral cancer, before performing gum care treatment to maintain good oral health. If you want to maintain a healthy mouth all the year round Emma will make sure you do.

Consider it your mouth MOT!

Tooth coloured fillings

We continue to improve our cosmetic dental services. A very common request we receive is to remove old silver fillings and replace them with cosmetic white ones. We do this either with tooth coloured composite, or computer generated CEREC porcelain inlays; all done in one visit! No impressions, no temporaries, no wait!

Smile Makeovers

These continue to be very popular and the desire for "straight white teeth" is one we hear almost every day. Programmes such as 10 Years Younger and Extreme Makeover, have made the demand for these treatments greater than ever.

You can see a wide range of makeovers we have done in the practice at our new website www.saving-faces.co.uk

Dental Implants

We also provide 2 types of dental implant; The IMTEC mini dental implant, and the BICON dental implant. Whether you have a single tooth missing, perhaps a larger gap, or maybe even loose dentures you would like to stabilize, we are almost certain to have an implant system to suit your needs.

Tooth whitening

Our Deep Bleaching tooth whitening is hugely popular, because of its predictability to whiten your teeth to the top of the shade guide unlike many other tooth whitening systems. We take before and after photos to make sure you are happy with the results.

Root Canal

We are delighted to welcome a new member of the team Kate Blundell. Kate qualified with honours (rare!) 5 years ago, and within 2 years had passed her Fellowship (even rarer!)

Her dental passion is Endodontics (root canal); that is saving abscessed teeth rather than removing them. This helps you hang on to your own teeth for as long as possible. As well as providing extremely high quality in her work, she is also extremely gentle and caring, putting a pain free patient experience at the top of her priorities. If you have a dental abscess and wish to save your tooth, Kate will do this gently for you.

Kate's other passion is music, and she is a brilliant local singer songwriter! You can see and hear her at her website www.kateblundell.com

Adult orthodontics

Over the last few years we have been looking for ways to overcome the 2 main objections of adults wanting to straighten their teeth with orthodontics, namely the desire not to wear unsightly metal braces, and secondly to try and complete the treatment quickly rather than the traditional 18-24 months.

We now have 2 new and 1 not so new ways of doing this.

The **Inman Aligner** and the **6 Month Smiles** are two new ways of achieving straight teeth, whilst **Invisalign**, which has been around a little longer is also available. All have their merits, and they can be discussed at our free cosmetic consultation.

Child Dental Care

In response to many requests, we will be providing high quality dental care for children on a pay so you go basis. I will be working together with Stella our Dental Therapist to provide this. Stella qualified a few years ago as top student in her year. She has been with us over a year, and provides all our beautiful tooth coloured fillings.

She loves working with children, and is committed to help bring the best preventive and restorative care for your children, from tooth brushing instruction to fluoride gels to diet counselling, to (hopefully not very many!) white fillings.

Like adults, prevention is the key, and regular continuing care children's mouth MOT's are the best way to look after your children teeth.

6 Month Smiles

Inman Aligner

6 Month Smiles

Combination Cosmetic Dentistry

We can now change unsightly smiles into beautiful natural smiles using a combination of modern adult orthodontics, and finally placing thin porcelain veneers. In this way, by moving teeth into position before placing our veneers, we can be extremely conservative in our tooth preparation i.e. No unnecessary drilling of the teeth! Once again a free cosmetic consultation can determine what is best for you.

Botox and Fillers

We continue to provide Botox and Dermal fillers to remove crows feet and fill unsightly nose to mouth lines as well as enhancing lips with Dermal Fillers. Examples and can be seen on the website www.saving-faces.co.uk under the facial aesthetics gallery.

relax...pamper yourself

Saving Faces Spa

We are delighted to be opening our brand new SAVING FACES spa. Rachael our beauty therapist will be offering a range of massage and facial treatments to relax and unwind you after your dental treatment. Not that you need to have been to the dentist to see Rachael and experience her soothing treatments! She will be using the very latest in facial aesthetic technology called the "Accelafuze" machine. This is from America, the first of its type in Merseyside and offers a combination of microdermabrasion, nutrient infusion into the skin, followed by collagen stimulating light therapy. Accelafuze may also be used together with gentle peels to give a fresh more youthful appearance. All in 1 visit!

We hope you enjoy our Spa room.

Many people pay for our treatment by 0% finance over 6-36 months. It is the ideal way of budgeting your new smiles or other dental and facial aesthetic treatments. The reception team will be delighted to help you.

Finally, we currently have the best team we have ever had here at the practice. We look forward to helping provide an even wider range of services in our new practice. We look forward to seeing you.
